

CLOUD SERVICE SOLUTIONS

PUBLIC CLOUD

A **hands-off, hassle-free** cloud solution that sacrifices high levels of security and performance for **scalability** and **cost**.

USE CASES

- 1 For backups as part of a disaster recovery plan
- 2 Email archiving
- 3 Application data

DEDICATED CLOUD

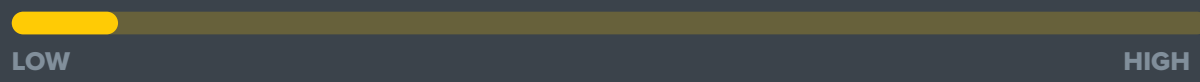

A cloud solution that **boasts** the highest levels of **security** and **performance** but is more expensive and less scalable than a public cloud solution.

USE CASES

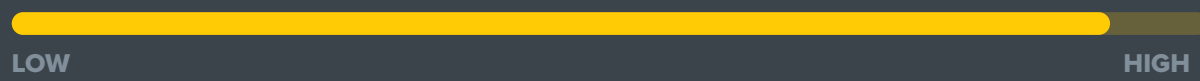

- 1 Security is a top priority
- 2 A highly customizable environment is required
- 3 External compliances must be obeyed

HYBRID CLOUD

A combination of **public** and **dedicated** cloud technologies that utilizes both **local** and **offsite resources**.

USE CASES

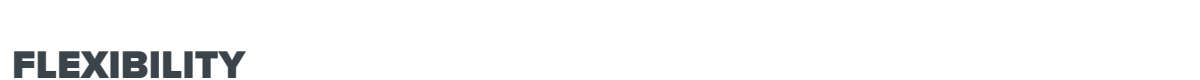

- 1 Performance and flexibility are a priority
- 2 A highly customizable environment is required
- 3 Different users have different requirements
